Winter

The International Edit Issue

Submission Deadline: 09.06.26

On Stands: 12.02.26

Austin is not only pushing the design industry forward through built work, but in new business models that make construction, high design, and innovation possible. This issue focuses on the client experiences, entrepreneurs, and gathering spaces that are shaping Austin into a global center of design.

Highlighting the best of the best architects, interior designers, builders, landscape designers -- and beyond.

We're going beyond cold plunges and infrared. This issue dives into the myriad ways design enhances health and wellness, both in our homes and around town.

We continue our cherished tradition of celebrating the homes on the AIA Austin Homes Tour. We also zoom out to focus on Austin's legacy of design legends, and a Designer Challenge.

One of the many things that makes Austin such a vibrant city is the influence by our friends from other places around the world. From aesthetics, to products, to simply a fresh perspective, globally inspired design brings new dimensions to our spaces.
